# Engagement metrics

## Multiple click-outs ([click here to see example](#))

- Social Boost formats with social icons have the option for different click paths\*
  - Most clicks will go to the destination URL (e.g. brand's landing page)
  - Clicks on social icons are directed to social page/post URLs
- *Option to remove icons so that 100% of external clicks to go destination URL*

## Engagement clicks ([click here to see an example](#))

- Social Boost carousel and video formats encourage greater ad engagement
  - Carousel: swipes/clicks to see different slides
  - Video: start/pause/volume video player controls
- Third-party click trackers can be used to report click activity either in aggregate (clicks to destination URL, social URLs and engagements) or only clicks to destination URL
- DSPs and publisher ad servers will report click activity in aggregate (clicks to destination URL, social icons and engagements)\*\*

\*Creatives flighted via DV360 in the EU have no social icons and one click-path

\*\*Currently in development is the ability to report on the type of clicks in greater detail
